

Point-n-shoot cameras - As a group can be defined as any camera with a fixed or non-interchangeable lens This includes the 1mpx camera on a cell phone to the 12 mpX Lumix by Panisonic (at \$600+)

Hybrid PnS with SLR features

Point -n- Shoot

Camera Phone

Single Lens Reflex - As a group, allow for interchangeable lenses are generally heavier, more complex, and more expensive. As with the film versions, the operator looks directly through the lens by way of a mirror and a prism system. When the shutter is released the mirror locks up out of the way of the sensor and the exposure is taken.

SLR/DSLR
